# WHO WE ARE

Eight companies - One network

We are a group of Italian companies, which have more than 50 years experience in plastics.

We joined forces in order to offer a **unique products portfolio, unparalleled experience, unbeatable service, together with full technical and commercial support.**

## Together, ITA Polymers delivers:

- Plastic additives and Flame retardants;
- Powder, compacted, liquid, additives blends;
- Plastic masterbatches;
- Technical compounds
- Glass fibre reinforced compounds
- Thermoplastic elastomers (TPE)
- Recycled & certified compounds (PCR/PIR)
- Reactive recycling technologies by extrusion

We want to offer a **complete, fast, and customised answer to the plastic industry.**

# OUR VALUES

*What drives us  
every day*

## TEAM SPIRIT

We demonstrate the true meaning of partnership and networking — our strength lies in what we build together.

## INNOVATION

By combining our expertise, we develop innovative solutions that no single company could achieve alone.

## CUSTOMER ORIENTED

We build long-standing relationships with our clients: from the first contact to technical support before and after every sale.

## SUSTAINABILITY

Each company contributes sustainable solutions — improving production efficiency and protecting health and the environment.

## FLEXIBLE & RELIABLE

We will give same attention to businesses of all sizes customers, providing solutions that combine the flexibility of a craftsman with the resources of a large-scale industry.

# THE COMPANIES

Our network, our strength

**Celloplast GD**  
flexible compounds

Thermoplastic elastomers (TPE) specialist: over 50 years of compounding expertise.

**diap**  
naturalmente compound

Manufacturer of flame-retardant PP compounds and masterbatches since 1978.

**GF Plast**  
DESIGN FOR PLASTIC RECYCLING

Supplier of certified recycled plastics and ground waste for sustainable compounding.

**greenchemicals**  
THE PARTNER FOR YOUR GROWTH

Formulation specialist in flame retardants and functional additives for plastics.

**mife**

Producer of colour masterbatches, additive masterbatches, and comby-batch solutions.

**PickUp**

Trading and manufacturing of tailor-made compounds across a broad polymer range.

**polichem**  
POWERED BY GREENCHEMICALS

Additives for PA and PET applications enhancing sustainability and production efficiency.

**SETA**  
POLYMERS

Manufacturer of masterbatch for high-tech plastics and tailor-made compounds.

# WHERE WE ARE

## Italian Companies but a Global Group

Our partner companies are based across the world, in key industrial regions that have long been home to world-class plastics and chemical manufacturing.

### ITALY

#### CELLOPLAST

Mozzate, CO  
(Lombardy)

#### GF PLAST

Megliadino San Vitale, PD  
(Veneto)

#### MIFE

Montorso Vicentino, VI  
(Veneto)

#### POLICHEM

Garlasco, PV (Lombardy)

#### DIAP

Cerreto d'Esi, AN (Marche)

#### GREENCHEMICALS

HQ - Desio, MB (Lombardy)  
Warehouse – Chiuduno, BG  
(Lombardy)

#### PICK UP

Fontanafredda, PN  
(Friuli Venezia Giulia)

#### SETA POLYMERS

Fontanafredda, PD (Veneto)

### WORLD GREENCHEMICALS

#### HUNGARY

Budapest

#### SWITZERLAND

Lugano

#### POLAND

Warsaw

#### USA

Wilmington - Delaware

#### CHINA

Shandong Province

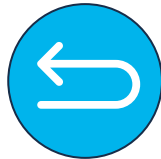

# OUR NUMBERS

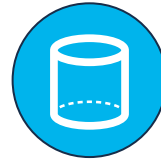

**8**

Production plants

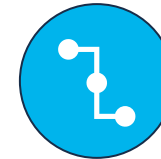

**50**

Extrusion lines

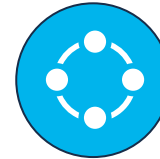

**15.000**

MTs/year capacity  
of masterbatches  
production

**50.000**

MTs/year capacity  
of plastic compounds

**5.000**

MTs/year capacity  
of powder, compacted,  
liquid blends

# PHYSICAL FORMS

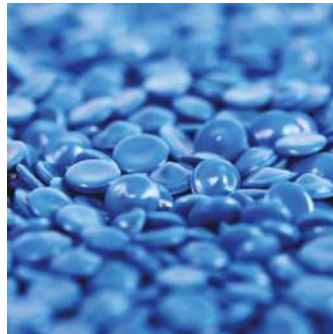

We provide our product in several physical forms:

Powder

Masterbatch

Granules

Ground

Liquid

Compacted

# THE LABORATORIES

We can provide the best quality and test services with 8 laboratories and their equipment:

8

laboratories extrusion lines + specimen molding machines

**Mechanical plastic test**

IZOD, Dynamometer for both tensile and flexural testing, Hardness tester, Injection moulding machine

**Chemical-Physical test**

IR, DSC, TgA, HPLC, MFI, Viscosity analysis

**Fire tests**

GLOW WIRE, UL94

# THE ADVANTAGES

## The best of both worlds: Artisanal and Industrial

### Human touch and high level of service

*What a trusted partner brings*

- Long-standing, personal client relationships
- Direct contact with our team at every stage
- Tailored, bespoke solutions for each customer
- Technical support before and after every sale
- Genuine flexibility and agility to respond fast

### Global and big scale supplying

*What a network delivers*

- Multiple solutions for every need, all in one place
- A broad, complementary product and service portfolio
- Faster response through shared resources and know-how
- Dedicated R&D laboratories across the network
- Consistent quality across seven specialised companies

# THE ADVANTAGES

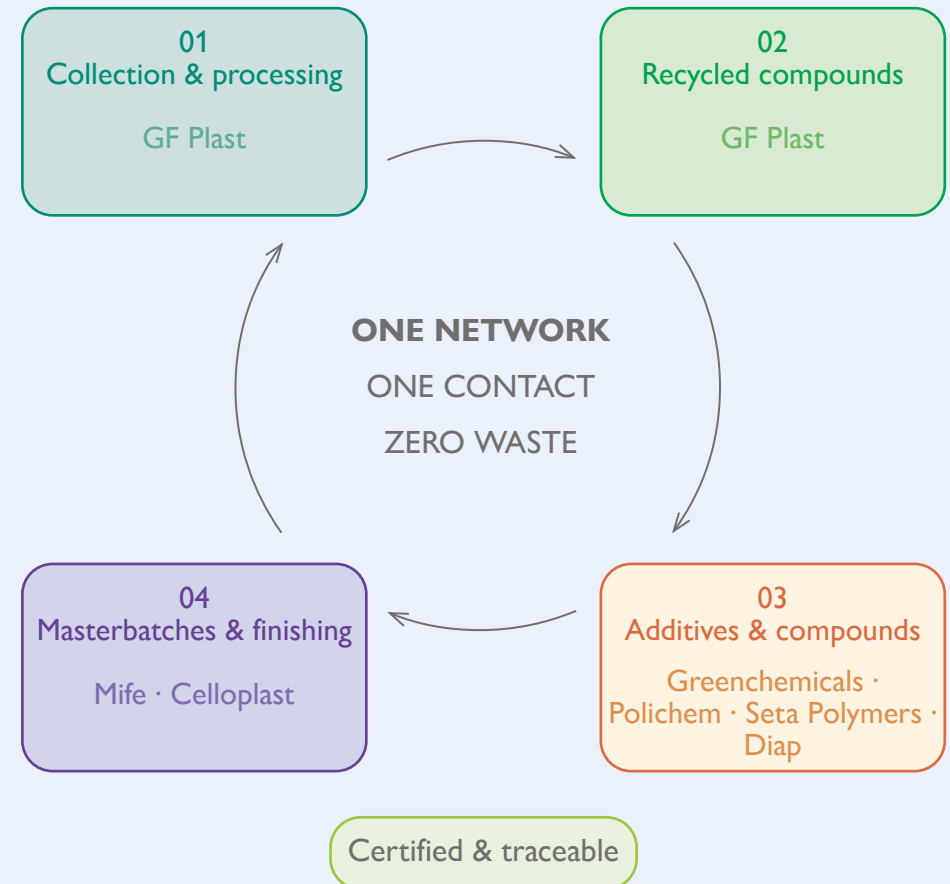

A 360° partner  
for plastic circular economy

## What happens to your plastic waste?

With ITA Polymers, the answer is no longer “a problem to manage“, it becomes a resource to valorize. **Our network of eight companies covers the entire circular value chain**, from the very first step, after collection of plastic waste to the finished product.

Plastic scrap and industrial waste can be collected and processed into certified secondary raw materials, then transformed into recycled compounds, functional additives, and colour masterbatches, ready to re-enter the production cycle.

**Every output is traceable. Every step is certified.** And throughout the entire process, the client has a single point of contact: ITA Polymers.

### Celloplast GD

flexible compounds

#### Main Products

Thermoplastic elastomers (TPE); cork-based compounds. SBS/SEBS/EPDM compounds, Synthetic cap compound, Expanded master.

#### Application Focus

*Elastomeric applications requiring tailored properties. Celloplast is a leading player in the TPE, TPV, TPO and MB Expandable markets.*

### diap

naturalmente compound

#### Main Products

Flame-retardant compounds and masterbatches based on polypropylene (PP).

#### Application Focus

*FR solutions for PP applications; custom formulations with dedicated technical support for specific production requirements.*

### Main Products

Halogen-free and low halogen flame retardants, antioxidants, UV absorbers, processing aids, nucleating agents, stabilizers, plasticisers, antistatic agents.

---

### Application Focus

*Compounding, recycling, engineering plastics (XPS/EPS/XPE), film, adhesives, PU, PA, PC, PS & HIPS, PET, PE.*

### Main Products

Chain extenders & IV enhancers, stabilisers, lubricants, processing aids, mould releasers, nucleating agents, anti-block/flow enhancers, anti-splitting agents.

---

### Application Focus

*PA and PET (recycling and extrusion); enhancing sustainability and efficiency across production cycles.*

### Main Products

Pre- and post-consumer recycled plastics; ground plastic waste for certified compounds.

### Application Focus

*Circular recycling economy; supplying compounders with materials certified for sustainable, traceable production.*

### Main Products

Pick Up mainly focuses on polyamide and polypropylene compounds, as well as high-performance materials such as PPO and PPA. The company also markets and distributes ABS, TPE, PC, POM, PBT, PP, and PE.

### Application Focus

*Trading of bespoke compounds; polyolefins, technical polymers, elastomers, and regenerated products.*

### Main Products

Colour masterbatches; additive masterbatches (FR, antioxidants, anti-block, fillers, desiccants, endothermic & exothermic blowing agents, photoluminescent, nucleating, slip agents); comby-batch (colour + additive in one granule).

---

### Application Focus

*Furniture, compounding, construction, packaging.*

### Main Products

Additive masterbatch: thermal and UV stabilizers, lubricants, chemical binders, compatibilizers, aesthetic effects and tailor-made products.  
Compounds: coloured and filled polyolefins, ABS and PS (talc, iron powder, FV, cork, wood...) also PSV-certified.

---

### Application Focus

*Masterbatch for high-tech plastics, furniture, automotive.*

LET'S BUILD SOMETHING TOGETHER

---

# ITA Polymers

*Eight companies. One vision. Complete solutions for the plastics industry.*
